Wall Street Stocks - TWTN STRONG BUY

Featuring: Twister Networks – OTC: TWTN

Ticker Symbol: (OTC Pinksheets) TWTN

Recent Price: \$0.69

Target Price: \$4.00

BUY THIS STOCK!

TWTN Offers Ground Floor Opportunity

In 1999 only 2 million Chinese had web access. By July of 2003, that number had grown to 68 million (second only to the United States).

TWTN sells for \$0.69 a share. Soon, almost 100,000,000 million will be able to use Twister Networks to make long distance phone calls over the Internet. Expect that share price to increase – significantly.

Get in under the radar. Buy OTC: TWTN. The big telecommunications companies are making headlines and paving the way for VoIP. This is keeping the attention off of Twister Networks. Too bad for others but good for you. TWTN is one of those buy low opportunities that may come around just once in a life time.

Why Invest in the VoIP

It's the old story of supply and demand. One hundred million Chinese and Vietnamese with Internet access can choose to pay more yuan for long distance calls (by using their cellphones) or less yuan by utilizing Twister Networks VoIP. Add to this the fact that Twister will be marketing it's products here in the States as well. Another very important factor to consider is; AT&T, Sprint and the other giants in the telecommunications industry are getting into VoIP in a big way. One might think this would hinder Twisters ability to gain market share. Truth is, when the big guys within an industry enter into a new technology (like VoIP) it gives the technology acceptance and credibility. From that point, the customer looks for the best deal and that will be TWTN.

TWTN Sets the Standard for VoIP

VoIP stands for *Voice over Internet Protocol*. In other words, it allows people and businesses to make long distance phone calls for up to 60% less by using an Internet connection.

The TWTN Plan...In the late 90's the Chinese government considered the Internet a threat. They restricted its use to the privileged few. Today, the government see's the Internet as a means of economic and cultural growth and it's promoting it's use. Twister Networks is positioned to enter the eastern (most populous) portions of China, as well as Vietnam and the United States. As popular as the Internet is in the West, the growth rate pales in comparison to the Far East. Over the last 5 years alone the number of Internet subscribers in China and Vietnam has risen from about 3 million to close to 100,000,000 and this extraordinary growth rate is expected to continue into the near future. Add to this the vastness of China and the fact that a great percentage of Vietnamese families are spread around the world. You can see why a low price Voice over Internet long distance solution like TWTN is...
