OVER \$1.4 BILLION in Sales Possible Over the Next 24 Months!!!*

RNNM ANNOUNCES COMMERCIALIZATION OF H2GO™

Drivers Can Save Up To 25% OFF Their Vehicle Fuel Costs!

Investors....Don't miss out on what could be the one of the **hottest stock opportunities** in the market today by researching Ronn Motor Company....

But do it **IMMEDIATELY** because a **major announcement** was just released - and the market has yet to react to its momentous significance.

Ronn Motor Company (OTC:RNNM) just announced that the Company will mass manufacture and commercialize its proprietary Hydrogen On-Demand (HOD) technology called H2GO™ that **can save drivers up to 25% Off their vehicle fuel costs.** That's right! The H2GO™ -hydrogen On-Demand fuel injection system can:

- ▶ **INCREASE** fuel efficiency up to 25%!
- ▶ **Be INSTALLED** on ANY piston combustion engine!
- ▶ **IMPROVE** power on vehicles!
- ▶ **DECREASE** green house gases by about 90%!

H2GO™ Can Be Installed on any SUV, Light Trucks, Cars, and Over the Road 18 Wheelers

This is a highly important factor. Why? Because high fuel prices affect every consumer when considering the cost of goods. You see, long haul commercial fleets that deliver goods – like food to grocery stores - could install a system that pays for itself within days when considering that the suggested retail price is at \$999 per unit.

Now, people might be asking themselves two questions....

First, what is a Hydrogen On-Demand Fuel Injection system?

And second, why are savvy traders investing in this company?

Well, the answer to both questions has to do with the fact that the **H2GO™ SYSTEM CONVERTS WATER INTO HYDROGEN FUEL TO ASSIST IN POWERING VEHICLES WHILE INCREASING FUEL EFFICIENCY BY UP TO 25%!**

Consumers need a solution to high fuels costs and the H2GO™ system is an answer. According to one report (GasBuddy.com September 24th, 2007), 20% of people spend over \$300 a month to fill up their cars. That's over \$3,600/yr. But businesses and commercial fleets can spend many times this amount per vehicle. The fuel costs for 18 wheelers can reach into the tens of thousands of dollars per year per truck. So, if traders do the math and see the great potential of this opportunity... as we enter one of the **hottest seasons for investing** this stock could soar.

Company:	RONN MOTOR COMPANY
Symbol:	OTC: R N N M
Current Price:	\$0.65

There are OVER 250 MILLION registered vehicles in the U.S. alone, and the company believes that 1/2% of 1% of this market is achievable with current fuel prices.... That's a **WHOPPING** 1.5 million units! In a recent press release, the company stated not only could they meet this demand but that they could achieve these optimistic sales projections within the next 18 to 24 months!

Let's face it. This is not rocket science. If 1.5 million units are sold for \$999.....that could generate **top end sales revenues for the product at over \$1.4 BILLION!!!!** How much could RNNM shares be worth? Could this emerging company become a household name?

Now the next logical question is this: How is the company planning on distributing the H2GO™? Well, here's the Company's answer: **RNNM also stated that they are currently completing negotiations and finalizing agreements** with a major manufacturer that will manufacture, warehouse, stock product and distribute the H2GO™ hydrogen system on a national basis through their existing national distribution channels, which will provide consumers with local installation centers nationwide.

REASONS TO OWN SHARES OF RNNM

- **Company Announces Commercialization of its proprietary technology branded H2GO™**
- **Company could generate enormous sales revenues**
- **Company finalizing manufacturing agreements**
- **Commercial fleet companies ready for solution to high fuel costs**
- **Company is receiving worldwide attention for its hydrogen technology**
- **H2GO™ system can be installed on any combustion engine vehicle**

*** **INVESTOR ALERT!** *** **SUPERLATTICE POWER (OTCBB: SLAT)** *** **INVESTOR ALERT!** ***

New Stock Issue Poised For MAJOR BREAKOUT!

Alternative Energy could be the #1 ranking sector in 2008 as investors continue to make a windfall of profits. With oil prices hitting a staggering \$138 per barrel, consumers are being forced to consider green friendly alternatives.

Superlattice Power Inc. (OTCBB: SLAT) – with its proprietary battery-power technology – could be among this years top “green” stocks. The Company is an emerging leader in the development & marketing of next generation lithium-powered automotive batteries worldwide...and shares have been UPTRENDING!

SLAT: The Next Big “Green Stock”?

It's a fact. Oil prices have increased approximately 100% in the last year and experts are predicting it to skyrocket to \$150 per barrel in coming months...and consumers need immediate relief!

That's just one reason why “Environmental Awareness” has become a TRILLION DOLLAR business. But don't forget that it's also the same reason investors are getting filthy rich as they ride this unprecedented spike in alternative energy awareness within the public markets.

MUST READ REPORT: Traders will read about a relatively undiscovered stock with a technological breakthrough that could make it practical for consumers to switch to emission-free vehicles. It is a clear leader in its field...it appears to have solid support at around \$2.00...it is aggressively moving higher in price...and it is poised to ride the hugely popular Alternative Energy stock wave!

Watch OTCBB: SLAT Trade!

Superlattice Power, Inc. (OTCBB: SLAT) entered the publicly traded Alternative Energy Sector less than two months ago - so take a look at its chart immediately! The stock has been on a torrid run!

• **NEWS ALERT!** OTCBB: SLAT Introduces Lithium Battery Allowing Extended Drive Ranges In All Electric Vehicles. The new Lithium Ion Polymer battery, with a new more affordable cathode material, Superlattice Structure, will be at the core of Hybrid's competition entry which increases drive ranges by 30% to 200 miles. The Company also announced a successful move towards large scale production of this new cathode material.

Top 3 Reasons To Watch SLAT:

#1. Massive Momentum Play!

Over the last 20 days SLAT has increased 221.21% (www.barchart.com 6/24/08) on steady volume and positive news. Technical indications suggest the stock has support around the \$2.00 level and could be poised to BREAKOUT! Watch SLAT – could it mirror its partner HYBR by exploding from \$2.00 to over \$6.00??? Consider loading up on SLAT today!

#2. Electric Cars – The Zero Emission Choice!

Experts agree that rising energy prices and environmental concerns could generate massive demand for affordable and economical hybrid and electric cars. SLAT is poised to benefit from this since their one-of-a-kind technology emits ZERO emissions!

#3. The Price of Lithium Shows Downward Trend!

The price of lithium batteries has gone down 15% in the last year. If this trend continues, SLAT's new technology could be in high demand since it provides 30% more range at a lower cost!

Put OTCBB: SLAT on Your Radar as Volume and Price EXPLODE!

Take a very close look at SLAT. The stock is poised for a major run after announcing its super lithium ion batteries can reach 200 miles per charge!

This relatively “undiscovered” stock has been quietly trading under Wall Street's radar...but not for long. If it follows the path of its partner, HYBR, it could make early investors HUGE RETURNS.

This could be one of the Top Investment Opportunities of 2008!

GO GREEN! WATCH SLAT! DON'T MISS OUT!
