## INDUSTRY INFO

Video pornography (rentals and sales) approximates \$6.4 Billion per year in revenues, having exhibited 18% to 20% annual growth. Knowledgeable industry sources state that the following sectors adds another \$6 Billion to this total.

- pay per view movies on cable and satellite;
- Internet Web sites;
- In-room hotel movies;
- Dating and Escort Services;
- Phone sex; and Sex toys.

Hence, total porn-industry revenues approximate \$12 Billion.

The latest market research statistics available come from a 1998 study completed by the highly regarded **Forrester Research** in Cambridge, Massachusetts, which placed the size of the porn-industry at \$10 Billion, and stated at the time that "...pornography is a bigger business than professional football, basketball and baseball put together." This was a 1998 figure, however, so our more recent estimate of \$12 Billion seems defensible

According to the President of one company in the porn business..."Porn videos, Internet Porn and Escort/Dating web sites are consumer services that no one admits using, yet these are shows that never close.

The increase in the industry's growth rate has been fueled by anonymity available to consumers. Rather than the "raincoat crowd" that frequented those seedier "peep show" joints, usually in a rundown inner city location, porn can now be purchased and shipped without revealing the identity of the purchaser. Moreover, the purveyors of porn have shrewdly deployed state-of-the-art software and billing techniques to ensure that the consumer's identity remains confidentiality.

Other useful statistics follow:

	<b>Hollywood</b>	<b>Adult</b>
<b>Number of Titles released last year</b>	<b>700</b>	<b>11,000</b>
<b>Production Costs (avg in 2000)</b>	<b>\$52 million</b>	<b>\$50,000</b>

Although there are over 70,000 Internet-porn websites, an article in the New York Times claimed that about a third of these are controlled by a few private companies...and that there is actually a physical epicenter for the porn industry: Chatsworth, California.

Looking ahead, the one development that holds the prospects of accelerating growth: DVD technology---and the ability to expand the reach of other porn-related services such as escorts, dating and e-communications ("Porn-pals") among those with similar interests. VCA Pictures is one of the leaders in porn services and websites. Wit Maverick is the Manager of VCA's DVD Production Unit, and claims that DVD technology will enable consumers to literally slice and dice their own movies.

As illustrated in the table below, the US Film Industry's revenues approximate \$8 Billion and has exhibited a 7% to 10% rate of growth in the last half pf the 1990's. Therefore, one can uncategorically state that the porn industry has been growing at about twice that rate of growth (Source: New York Times 2001 Almanac). The introduction of new technologies for the delivery of porn-to-consumers has the real potential to increase this rate of growth.

#### Box Office Receipts (in Billions)

1990: \$5.0  
 1995: \$5.5  
 1996: \$5.9  
 1997: \$6.4  
 1998: \$6.9  
 1999: \$7.5  
 2000: \$8.0 (prelim)

This is the bottom line research that shows proof that owning your own Internet Adult web site offers the largest money making opportunity available today for the home based business opportunist. Internet Dating is therefore the natural front door of this opportunity for someone looking to capitalize on the income opportunity without openly admitting they are in the adult business.
